THE BEST TIME TO FLY THE BEST IS NOW

Why AIR AUGSBURG?

SIX REASONS

01 Proven and Safe

With more than 1,700 PC-12s in the field, and over seven million flight hours behind the ultra-reliable Pratt & Whitney Canada PT6 engine, experience makes a difference. The PC-12 leads the industry in sales and enjoys a safety record on par with twin-engine business jets.

03 Countless Destinations

The PC-12 NG can use runways as short as 2,485 feet (758 metres) at its maximum weight and operate from dirt, gravel, and grass surfaces. The PC-12 NG can take you places you've never been in a business aircraft. Fly closer to your ultimate destination and save overall travel time.

05 Unbeatable Range / Payload

The PC-12 NG is, with two Pilots and 6 Passenger on Board, able to reach Destinations which are 2500km far away. The maximum Range is 3400km. This Range & Payload no Businessjet that Size can reach.

02 Best Cabin in Its Class

With 330 cubic feet (9.34 cubic metres) of cabin volume, you'll enjoy more space than business jets costing twice as much. New executive seats, more headroom, larger cabin windows and modern interior take the PC-12 NG to an entirely new level of comfort and productivity.

04 Cargo Door

Other than our own PC-24 Super Versatile Jet, no other business aircraft features a standard cargo door in addition to a main passenger entry door. Designed to allow a fork-lift to load a standard size pallet directly into the cabin, it can surely fit your luggage, your motor bike, and your surfboard.

06 Unrivalled Efficiency

Maybe it's our Swiss DNA, but we are not wasteful, and neither are our aircraft. The whole concept behind the PC-12 NG is to travel farther, faster, in more comfort, on less fuel and lower carbon emissions.
